

A420 802.11ac Wi-Fi USB STB Adapter User Guide

oulwo

For correct installation of the USB Wi-Fi dongle with your set-top box (STB) follow the instructions included with this product. Only use the Amino supplied USB Wi-Fi dongle.

Initial installation of the STB may require a software download via a wired Ethernet connection to your router / access point before the Wi-Fi dongle can be installed. This device is restricted to be used indoors.

This device complies with Part IS of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part IS of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

— Reorient or relocate the receiving antenna.

— Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

(1) The manufacturer is not responsible for any radio or TV interference caused by unauthorised modifications to this equipment. (2) To avoid unnecessary radiation interference, it is recommended to use a shielded RJ45 cable

The following paragraphs describe requirements and conformity.

Conformity
The manufacturer supplied USB dongle has been tested in accordance with: 60950-1:2005 (2nd edition)

European Approvals
This product complies with EU Directives:
2006/95/EC (Low voltage Directive) 2004/108/EC (EMC Directive) 2011/65/EU (RoHS Directive) 1995/5/EC (R&TTE Directive)

Product Disposal Information - EU only
Amino products are labelled in accordance with the European Directive 2012/19/EU concerning Waste Electrical and Electronic Equipment (the WEEE Directive) and therefore should not be disposed of with other household or commercial waste. Product Disposal Instructions for Residential Users: Please remove any batteries and dispose of them and the product as per your local authority's recycling processes. For further information please contact your local authority or the retailer where the product was purchased. Product Disposal Instructions for Business Users: Business users should contact their supplier and check the terms and conditions of the purchase contract and ensure that the product is not mixed.

nino Communications Ltd Buckingway Business Park, Anderson Road, Swavesey, Cambridge, CB24 4UQ, United Kingdom

- Switch off the set-top box.
- 2. Insert the Wi-Fi adapter into one of the USB sockets on the set-top box.
- 3. Unplug the Ethernet (network) connection from the set-top box.
- 4. Switch on the set-top box. After the set-top box has finished its start up sequence you will be prompted to press ok to configure Wi-Fi.
- 5. Press ok. You will be prompted to enter your country. Select your country and press ok.

 The Wi-Fi adapter will perform a scan for nearby wireless networks. From the list of displayed networks, select the network that you want to connect to (this is usually written on the back of your Wireless Access Point).
- 6. You will be prompted to enter your network security key (this is usually written on the back of your Wireless Access Point).

 Once the SSID and password have been entered, the set-top box will attempt to connect to your network. If the connection fails you will be prompted to re-enter your network security key. Check that the key is correct (remember it is case sensitive) and try again. You may need to re-boot your set-top box to enable connection to the network.
- Once connected you should receive the same network services as you would if you were connected using a wired network connection.
